An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE CLAIMS:

Claim 14, line 1, change "12" to -- 13 --.

\*\*\* NOTE: An attempt was made by the Examiner to reach Applicants' Representative, with no response. The above change is made in order to merely correct for an error, typographical in nature. The above change does not affect the scope in any manner, and more importantly, the change does not further limit the claim language. It is clear from the claim language that Claim 14 was intended to be dependent from Claim 13 as opposed to Claim 12. \*\*\*

The following is an Examiner's Statement of Reasons for Allowance: The claimed combinations found within Independent Claims 1 and 7, are considered to be novel and unobvious in view of the Prior Art of Record. Claims 1 and 7 require a SCR having a drain contact and an emitter contact. This feature distinguishes from Prior Art, which utilizes separate components for the SCR and MOSFET, although this feature of fabricating a SCR with a MOSFET is known. See Au et al. (5,528,188). The Independent Claims further require, as in Claim 1, that the emitter contact is connected to the protected node and the drain contact is connected to the protected node through a triggering

control circuit; the Method claim, Claim 7 defines the SCR having an emitter contact and drain contact and wherein when a voltage pulse is applied across the anode and cathode of the SCR, the respective times at which the voltage pulse is applied to the drain contact and the emitter contact is controlled. Au et al. teach triggering control circuitry (RC) being connected to the gate of the MOSFET and with the drain (of Q1) and the emitter (of T2) being directly connected to the protected node. There is no controlling of respective pulse application times taught, nor is there taught connecting the drain contact via a triggering control circuit. There does not appear to be strong motivation to combine or modify the Prior Art of Record so as to meet or make obvious the claimed combinations found in Independent Claims 1 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald W. Leja whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571)272-
